DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a video object composed of a plurality of video object units and cell information is recorded on an optical disk. According to a user indication, picture data to be deleted is specified in the cell information. Independent claim 1 identifies the uniquely distinct features, "a judging unit operable to judge whether $j-i-1 > u$ or $j-i-1 < u$, $j-i-1$ being a total number of blocks present between an i th block which includes the start point and a j th block which includes the end point, i and j being integers, and u being a predetermined integer; a warning unit operable to give a warning to the user, when $j-i-1 < u$; and a partial deleting unit operable to rewrite, when $j-i-1 > u$, the section information so that part of the reproduction section preceding the delete section and part of the reproduction section succeeding the delete section become two consecutive reproduction sections, and delete blocks from an $(i+s+1)$ th block to a $(j-t-1)$ th block from the optical disk, s and t being integers that satisfy $u=s+t$."

The closest prior art, Ando et al. (US Pat. No. 6603923) and Okada (US Pat. No. 6181870) discloses video objects cell information recorded on an optical disk, fail to anticipate or render to the above underlined limitations obvious.

Conclusion

2. Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
